HUY D. VU SUPERVISORY PATENT EXAMINER TECHNOLOGY CENTER 2600

## Application No.

## Continuation Sheet (PTOL-303) 09/545,888

Continuation of 2 and 5. NOTE:

The claims have been amended to include the limitation "one or more extension nodes, each selectively identified with a unique telephone number" or a variation thereof. This limitation was not previously included in the claims, and therefore it raises new issues that would require futher consideration and/or search. In a similar vein, the amendments to claim 16, and by extension claim 17, broadens the scope of the claim and therefore such amendments raise new issues that would require futher consideration and/or search. Examiner will not comment on the arguments made by Applicant concerning these limitations since these limitations will not be entered.

In addition, Applicant argues that the restriction requirement regarding claims 12-14 is improper since claims 12-14 are dependent claims. As dependent claims, Applicant asserts that the addition of these claims is not an additional burden on the Examiner since a search has already been conducted on the independent claims. Examiner, respectfully, disagrees. Examiner is required to examine all claims in the application to determine whether or not such claims contain allowable subject matter. Therefore, Examiner is required to consider and/or search all dependent claims in addition to the independent claims. As such, contrary to Applicant's assertion, the dependent claims are an additional burden for the Examiner. Therefore, Examiner maintains the restriction requirement for claims 12-14.

Applicant further argues, with respect to the rejection of claims 8 and 9, that the combination of Shima and Ho is improper since "Ho is intended for an environment that has no central controlling". Examiner, respectfully, disagrees. Since Examiner previously responded to Applicant's arguments in paragraph 3 of the Final Rejection, Examiner will rely on these comments to respond to Applicant's additional arguments.
